BACnet MS/TP Controller to OPC UA

FEATURES

- Fully configurable BACnet MS/TP responder

- BACnet MS/TP supports device, binary I/O, analog I/O, and character string value object types

- Fully configurable OPC UA server

- Up to 10 read and write groups with up to 200 nodes per group

- Effortless Browser Based Configuration, no programming software is required

- Simple data translation allows you to manipulate data as it passes between protocols

- Guaranteed Stock

- 5-Year Hardware Warranty

Get Your BACnet MS/TP Controllers Connected to OPC UA

The 460MBSUS connects a BACnet MS/TP system and up to three OPC clients

Best of all, the product is made in the USA, always in stock, and comes with 5-year warranty.

How Do I Use the 460BMSUS-N2E in My Application?

Incoming and outgoing BACnet MS/TP analog and binary data is mapped to OPC nodes. The data moves bidirectionally.

It's really that simple to convert data to the information systems you need to monitor your application.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.
When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

MS/TP Master   **460BMSUS-N2E**   **Client**

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: **To move your data where you need it, when you need it, and how you need it.**
