Connect EtherNet/IP devices to your Legacy PLC Data Tables

You can now make your legacy serial PLCs talk to EtherNet/IP adapter devices! Any of your old serial PLCs like the PLC5, SLC, or MicroLogix can now read and write cyclic data from EtherNet/IP devices.

It's the perfect tool to keep those old legacy PLCs from the scrap pile.

How Do I Use the 460ECDFM-N700 in My Application?

For most applications, the mapping is very straightforward. PLC data table values (File like N7:200 and F9:1) are mapped directly into the input and output assemblies of the mating EtherNet/IP device connections.

It really is that simple.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.
When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.
