Real Time Automation Gateways

460MMTCP-NNA1

Wireless Ethernet TCP/IP to Modbus RTU Slave Gateway

FEATURES

- Fully configurable Modbus RTU master
- Connects up to 32
 Modbus RTU slaves
- Support up to 10 TCP/IP devices
- Parse & concatenate
 ASCII data in up to 50
 segments by delimiter
 or offset
- Effortless Browser
 Based Configuration,
 no programming
 software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- Guaranteed Stock
- 5-Year Hardware Warranty

Get Data from Modbus RTU Slaves into Your Ethernet TCP/IP System

The 460MMTCP moves data between up to 32 Modbus RTU slaves and an Ethernet TCP/IP device. With the 460MMTCP, you have a tool to help you map Modbus RTU device data into PC or embedded TCP socket-based systems. Connect to your Ethernet TCP/IP Devices over Wi-Fi using Wi-Fi IEEE 802.11 b/g/n at 2.4GHz with AES encryption 128-bit.

Best of all, the product is made in the USA, always in stock, and comes with 5-year warranty.

How Do I Use the 460MMTCP-NNA1 in My Application?

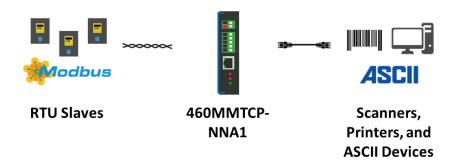

Register and coil data from your Modbus RTU slaves is concatenated in an ASCII string. Data from the TCP/IP device can be parsed into up to 50 segments, assigned a data type and then delivered to a user-defined register and coil locations on Modbus RTU.

It's really that simple. Need to modify your data as it passes from one protocol to the other? No problem. Each data mapping you apply can be modified with up to three mathematic functions. Add 4 to a value, multiply by 4 and divide by 10 with ease.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

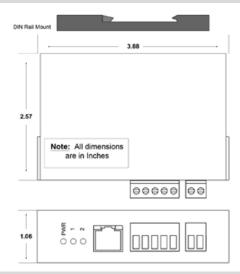

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: To move your data where you need it, when you need it, and how you need it.

Modbus RTU Master	
Operation Mode	Modbus RTU Master
Function Codes Supported	1,2,3,4,5,6, 15 & 16
Swapping	Byte and Word Swapping
Maximum Modbus RTU Slave Devices	32
Number Read/Write Scan Lines per RTU Slave Device	200 Total - 100 reads & 100 writes
Scan Line Support	Up to 125 Registers or 512 Coils
Ethernet TCP/IP	
Operation Mode	Client or Server
Maximum Number of Devices Supported	10
Maximum Number of Characters Transferred	1024
Delimiter Processing	Incoming delimiters can be automatically removed; Outgoing delimiters automatically added if configured
Parsing	Parse String of ASCII Data in up to 50 Segments by Delimiter or Offset
Concatenation	Concatenate up to 50 segments/strings of ASCII data with optional delimiter
INCLUDED WITH GATEWAY	
3' power cable with flying leads	5-year hardware warranty
IPSetup software – automatically locates RTA gateway on the network	Unlimited firmware feature upgrades for life
CAT5 crossover cable for direct connection to PC during programming	Complete, unlimited access to our industry leading support staff
Manual	

ELECTRICAL / ENVIRONMENTAL		
DC Input Voltage	12-24 VDC	
Maximum Baud Rate	115K baud	
Operating Temperature	-40 C to 85 C	
Certification	RoHS-Compliant, UL, CUL, CE Approvals	
ENCLOSURE / HARDWARE		
Size	3.88" x 2.57" x 1.06"	
Weight	5.5 oz	
Enclosure Type	Anodized Aluminum	
Mounting	Din rail or panel mount	
LEDs	Power LED & 2 general purpose LEDs on side	
GATEWAY FEATURES & FUNCTIONS		
Alarming	Set <, <=, >, >=, ==, !=, and change-of-state rules on any data moving through the gateway. If alarm rule is triggered an email notification can be sent.	
Gateway Security	You can configure up to 9 different users access to diagnostic and configuration screens.	
Translation Table	Allows for data manipulation during protocol translation. Scaling and other data format changes can occur in the gateway.	
Status and Counters	Protocol specific status, counters, and error messages are accessible within the gateway's diagnostics page. They can also be delivered to a connected device.	
Diagnostic Logging Page	Allows users to see and log start up sequences, protocol specific messages & error messages.	

NOT EXACTLY WHAT YOU WERE LOOKING FOR?

Real Time Automation offers a full line of gateway products. Give us a call at 1-800-249-1612. Or, check out a listing at www.rtautomation.com/products. We also offer customizations for unique applications.

CATALOG #	DESCRIPTION
460MMTCP-NNA1	Connects up to 32 Modbus RTU slaves with as many as 10 Ethernet TCP/IP devices
