460TCPDFM-N2EW

Access DF1 Devices via a

TCD/ID Sacket Connection

FEATURES

- Support up to 10 TCP/IP devices
- Parse & concatenate ASCII data in up to 50 segments by delimiter or offset
- Support for PLC5, SLC and MicroLogix PLCs
- Connect up to 32 DF1 serial devices
- Effortless Browser
 Based Configuration,
 no programming
 software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- Guaranteed Stock
- 5-Year Hardware Warranty

Map Your Legacy PLC to a TCP/IP Socket

You can now make your legacy serial PLCs look like Ethernet TCP/IP data! Any of your old serial PLCs like the PLC5, SLC, or MicroLogix can now provide data to Ethernet TCP/IP applications.

It's the perfect tool to keep those old legacy PLCs from the scrap pile.

How Do I Use the 460TCPDFM-N2EW in My Application?

Incoming and outgoing ASCII data in TCP/IP packets are parsed into data segments and given a data type. Those values are them mapped to mating file locations in the DF1 devices like N7:200 or F9:1.

It really is that simple.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

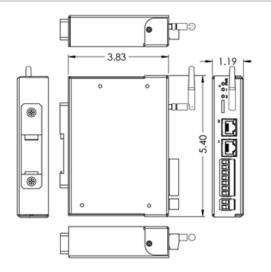

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: To move your data where you need it, when you need it, and how you need it.

Ethernet TCP/IP		
Operation Mode	Client or Server	
Maximum Number of Devices Supported	10	
Maximum Number of Characters Transferred	1024	
Delimiter Processing	Incoming delimiters can be automatically removed; Outgoing delimiters automatically added if configured	
Parsing	Parse String of ASCII Data in up to 50 Segments by Delimiter or Offset	
Concatenation	Concatenate up to 50 segments/strings of ASCII data with optional delimiter	
DF1 Master		
Operation Mode	DF1 Master Full Duplex and DF1 Master Half Duplex	
PLCs Supported	MicroLogix 1000, SLC 5/03 5/04 5/05, most PLC5s	
Maximum number of Devices supported	1 in Full Duplex Mode, 32 in Half Duplex	
Data Type Supported	100 Integers or 100 Binaries, or 50 floats, 82 character string per Scan line	
Scan Lines	100 input / 100 output	
Physical Connections	RS-485 and RS-232	
INCLUDED WITH GATEWAY		
3' power cable with flying leads	5-year hardware warranty	
IPSetup software – automatically locates RTA gateway on the network	Unlimited firmware feature upgrades for life	
CAT5 crossover cable for direct connection to PC during programming	Complete, unlimited access to our industry leading support staff	
Optional: Generic 1761-CBL-PM02 Cable	Optional: NULL Modem Cable
